

# Contents

## **Chapter 1: Overview of Mechanisms of Defense 1**

Clinical Correlation: Simian Acquired Immune Deficiencies	1
Learning Objectives	1
Essential Involvement of Animal Immune Systems in All Aspects of Animal Health	1
<b>Immune System</b>	<b>2</b>
Cells of Defense	3
Communication between Cells of the Immune System	3
<i>Communication through cytokines</i>	3
<i>Other cytokines</i>	4
<i>Communication through other signaling molecules</i>	4
<i>Communication through cell–cell contact</i>	4
Innate and Adaptive Immune Systems	5
<i>Innate immune system</i>	5
<i>Adaptive immune system</i>	9
<b>Clinical Correlation Follow-Up</b>	<b>16</b>
Student Considerations	16
Possible Explanations	16

## **Chapter 2: Overview of the Innate Immune System 17**

Clinical Correlation: Cyclic Neutropenia in Gray Collies	17
Learning Objectives	17
Anatomical and Physiological Barriers to Microbial Invasion	18
Epithelial Barrier	18
Secretions	18
Mucus and Mucociliary Clearance	20
Commensal Organisms	21
<b>Cells of the Innate Immune System</b>	<b>21</b>
Hematopoiesis	21
Coordinating Hematopoiesis	23
Monitoring Hematopoiesis	23
<b>Overview of the Cells of the Innate Immune System</b>	<b>25</b>
Myeloid Innate Immune Cells	25
<i>Neutrophils</i>	25
<i>Eosinophils</i>	26
<i>Basophils</i>	27
<i>Monocytes</i>	28
<i>Macrophages</i>	29
<i>Myeloid dendritic cells</i>	30
<i>Mast cells</i>	31

Lymphoid Innate Immune Cells	31	<b>Chapter 4: The Complement System</b>	<b>53</b>
<i>Natural killer cells</i>	31		
Other Innate Immune Cells	33	<b>Clinical Correlation: C3 Deficiency in Brittany Dogs</b>	53
<b>Clinical Correlation: Follow-Up</b>	33	<b>Learning Objectives</b>	53
Student Considerations	33	<b>Complement Activation</b>	54
Possible Explanations	34	Classical Pathway	55
		Lectin Pathway	57
		Alternative Pathway	58
		Terminal Membrane Attack Pathway	60
<b>Chapter 3: Innate Immune Recognition</b>	<b>37</b>	<b>Regulation of Complement Activation</b>	<b>60</b>
<b>Clinical Correlation: Sepsis in Neonatal Foals</b>	37	<b>Outcomes of Complement Activation</b>	<b>62</b>
<b>Learning Objectives</b>	38	Inflammation and Chemotaxis	62
<b>Introduction</b>	38	Enhancement of Phagocytosis (Opsonization)	63
<b>Evolutionarily Conserved Molecular Patterns</b>	40	Promoting Humoral Immunity	63
Pathogen-Associated Molecular Patterns	40	Clearance of Immune Complexes	64
<b>Pattern-Recognition Receptors</b>	40	<b>Clinical Correlation: Follow-Up</b>	64
Signaling Pattern-Recognition Receptors	41	Student Considerations	64
<i>Toll-like receptors</i>	42	Possible Explanations	64
<i>NOD-like receptors and RIG-like receptors</i>	44		
Phagocytic Pattern-Recognition Receptors	44	<b>Chapter 5: Acute Inflammation</b>	<b>67</b>
Other Pattern-Recognition Receptors	46	<b>Clinical Correlation: Acute Bovine Mastitis</b>	67
<b>Innate Recognition of Damage-Associated Molecular Patterns</b>	46	<b>Learning Objectives</b>	67
Inflammasome	48	<b>Purposes of Acute Inflammation</b>	68
<b>Consequences of Danger Signal Recognition by Sentinel Cells</b>	50	<b>Signs of Acute Inflammation</b>	69
Activation of Macrophages	50	<b>Initiators and Mediators of Acute Inflammation</b>	70
Proinflammatory Mediators	50	<b>Vascular Changes in Acute Inflammation</b>	72
<b>Clinical Correlation: Follow-Up</b>	50	<b>Leukocyte Recruitment</b>	75
Student Considerations	50	Leukocyte Extravasation	75
Possible Explanations	51	Diversity and Timeline of Leukocyte Recruitment	79
		<b>Systemic Effects of Acute Inflammation</b>	<b>80</b>
		<b>Clinical Correlation Follow-Up</b>	<b>85</b>
		Student Considerations	86
		Possible Explanations	86

## **Chapter 6: Innate Cellular Effector Mechanisms** **89**

Clinical Correlation: Rattles in Foals	89
Learning Objectives	90
Classification of Innate Cellular Effector Mechanisms	90
Phagocytes and Phagocytosis	91
Phagocytosis Part I: Recognition and Adhesion of Particles on the Plasma Membrane of the Phagocyte	91
Phagocytosis Part II: Membrane and Cytoskeletal Reorganization to Mediate Particle Engulfment and the Creation of a Phagosome	94
Phagocytosis Part III: Maturation of the Phagosome into a Microbicidal and Degradative Phagolysosome	94
Extracellular Innate Effector Mechanisms	99
Degranulation by Neutrophils and Eosinophils	99
Release of Neutrophil Extracellular Traps	100
Natural Killer Cell–Mediated Cytotoxicity	101
Recognition of Target Cells	101
<i>Activating stimulus</i>	101
<i>Inhibitory stimulus</i>	102
Targeted Degranulation by Natural Killer Cells	102
Antibody-Dependent Cell-Mediated Cytotoxicity	105
Clinical Correlation: Follow-Up	105
Student Considerations	105
Possible Explanation	106

## **Chapter 7: Cells and Organs of the Adaptive Immune System** **109**

Clinical Correlation: Feline Lymphadenopathy	109
Learning Objectives	109

Organs and Cells of the Adaptive Immune System	109
Primary Lymphoid Organs and Hematopoiesis	110
<i>Bone marrow</i>	110
<i>Thymus</i>	112
Secondary Lymphoid Organs	114
<i>Lymph nodes</i>	115
<i>Spleen</i>	117
<i>Mucosa-associated lymphoid tissue</i>	118
Clinical Correlation: Follow-Up	119
Student Considerations	120
Possible Explanations	120

## **Chapter 8: Antigens and Antigen Processing** **121**

Clinical Correlation: Caprine Arthritis Encephalitis	121
Learning Objectives	122
Stimulators of Adaptive Immunity: Pathogens, Antigens, and Epitopes	122
Major Histocompatibility Complex	124
History of the Major Histocompatibility Complex	124
Major Histocompatibility Complex Genetics	125
Structure and Distribution of Major Histocompatibility Complex Class I and Class II Molecules	129
Antigen–Major Histocompatibility Complex Interactions	131
Antigen Acquisition, Processing, and Presentation	132
Antigen-Presenting Cells	132
Major Histocompatibility Complex Class I Antigen Processing and Presentation	135
Major Histocompatibility Complex Class II Antigen Processing and Presentation	136
Cross-Presentation	137
Clinical Correlation: Follow-Up	139
Student Considerations	140
Possible Explanations	140

## **Chapter 9: T-Lymphocyte Development 143**

<b>Clinical Correlation: Severe Combined Immunodeficiency Disease in Arabian Foals</b>	<b>143</b>
<b>Learning Objectives</b>	<b>143</b>
<b>T-Cell Receptor Genes</b>	<b>144</b>
Structure of the T-Cell Receptor	144
T-Cell Receptor Gene Families	145
Gene Rearrangement in the Thymus	145
<b>T-Cell Selection in the Thymus</b>	<b>150</b>
Products of T-Cell Gene Rearrangement	150
Positive Selection of Functional T Cells	153
CD4, CD8, and Major Histocompatibility Complex Recognition	155
Negative Selection of Self-Reactive T Cells	155
T-Helper, Cytotoxic T, and T-Regulatory Cells	156
$\gamma/\delta$ T Cells	156
<b>Clinical Correlation: Follow-Up</b>	<b>158</b>
Student Considerations	158
Possible Explanations	158

## **Chapter 10: T-Cell Activation 161**

<b>Clinical Correlation: Canine X-Linked Severe Combined Immunodeficiency</b>	<b>161</b>
<b>Learning Objectives</b>	<b>162</b>
<b>Antigen Recognition by T Cells</b>	<b>162</b>
First Signal: T-Cell Receptors and Major Histocompatibility Complex–Antigen Interactions	162
Second Signal and Major Histocompatibility Complex–CD4/8 Interactions	164
Signal Transduction and T-Cell Activation	166

Third Signal and T-Helper Cell Differentiation	168
<b>Effector T Cells</b>	<b>169</b>
Effector T-Helper Cells: Th1, Th2, Tfh, and Th17 Cells	169
Effector Regulatory T Cells: Treg, Th3, and Tr1 Cells	171
Effector Cytotoxic T Cells	173
<b>Clinical Correlation Follow-Up</b>	<b>177</b>
Student Considerations	177
Possible Explanations	177

## **Chapter 11: B-Cell Development 181**

<b>Clinical Correlation: Equine Agammaglobulinemia</b>	<b>181</b>
<b>Learning Objectives</b>	<b>181</b>
<b>B Cells and the Structure of the B-Cell Receptor</b>	<b>182</b>
<b>B-Cell Genetics, Development, and Circulation</b>	<b>183</b>
B-Cell Receptor Gene Families, Genetic Rearrangement, and Junctional Diversity	183
Order and Regulation of B-Cell Development	186
Immunoglobulin Isotypes	189
<b>Other Populations of B Cells</b>	<b>191</b>
B-1 B Cells	191
Marginal-Zone B Cells	194
<b>Clinical Correlation Follow-Up</b>	<b>195</b>
Student Considerations	195
Possible Explanations	195

## **Chapter 12: B-Cell Activation and Differentiation 197**

<b>Clinical Correlation: Selective Immunoglobulin A Deficiencies in Dogs</b>	<b>197</b>
<b>Learning Objectives</b>	<b>197</b>
<b>T-Dependent B (B-2) Cells</b>	<b>199</b>

Interaction of B Cells with Antigens	199	Memory B Cells	238
B Cells as Antigen-Presenting Cells	203	Memory T Cells	238
Activation of B Cells by T-Helper Cells	204	<b>Clinical Correlation Follow-Up</b>	239
Isotype Switching, Somatic Hypermutation, and Terminal Differentiation of B Cells into Plasma Cells	206	Student Considerations	239
<b>Antibody Effector Functions</b>	213	Possible Explanations	239
Pathogen and Toxin Neutralization	213	<b>Chapter 14: Fetal and Neonatal Immunity</b>	<b>241</b>
Oponization and Activation of Complement	213	<b>Clinical Correlation: Failure of Passive Transfer</b>	241
Distribution and Function of Fc Receptors	214	<b>Learning Objectives</b>	241
<b>Clinical Correlation Follow-Up</b>	215	<b>Fetal Development of the Immune System</b>	241
Student Considerations	215	<b>Maternal Transfer of Immunity</b>	243
Possible Explanations	217	Prenatal Transfer of Immunity	243
<b>Chapter 13: Adaptive Immune Responses to Infections and Immunological Memory</b>	<b>219</b>	Postnatal Transfer of Immunity	245
<b>Clinical Correlation: Canine Parvovirus and the Wolves of Isle Royale</b>	219	<b>Neonatal Acquisition of Memory and Immune Capacity</b>	248
<b>Learning Objectives</b>	220	<b>Vaccination of Neonates</b>	249
<b>Adaptive Immunity: The Big Picture—</b>		<b>Clinical Correlation Follow-Up</b>	251
From Insult to Recovery	221	Student Considerations	251
Routes of Infection	223	Possible Explanations	252
Mechanisms of Pathogenesis	223	<b>Chapter 15: Vaccination</b>	<b>253</b>
Innate Response Cells and Cytokines of Innate Responses	225	<b>Clinical Correlation: Animal Vaccines</b>	253
Effector T Cells Home to Sites of Infection and Inflammation	226	<b>Learning Objectives</b>	253
Antibody Responses Develop in Secondary Lymphoid Tissues	229	<b>Vaccines</b>	253
Importance of Different Adaptive Responses to Clearance of Different Pathogens	233	Vaccine Characteristics	253
Immune Responses in the Gut	233	Live-Attenuated Vaccines	255
<b>Immunological Memory</b>	237	Killed Vaccines	259
Primary and Subsequent Immune Responses	237	Component, Toxoid, Conjugate, Recombinant, and Naked DNA Vaccines	259
		Adjuvants	263
		Administration	266
		Frequency	266
		<b>Passive Immunotherapy</b>	267
		<b>Clinical Correlation Follow-Up</b>	268
		Student Considerations	268
		Possible Explanations	268

**Chapter 16: Immune Deficiencies and Immune-Mediated Diseases 271**

Clinical Correlation: Feline Immunodeficiency Virus	271
Learning Objectives	271
Immune Deficiencies	272
Congenital Immune Deficiencies	272
Acquired Immune Deficiencies	273
Immune-Mediated Diseases	274
Hypersensitivities Type I, III, and IV	274
Type I hypersensitivities	274
Type III hypersensitivities	279
Type IV hypersensitivities	282
Type II Hypersensitivities and Autoimmune Diseases	283
Clinical Correlation Follow-Up	284
Student Considerations	284
Possible Explanations	284

**Chapter 17: The Immune System and Cancer 287**

Clinical Correlation: Canine Cancer	287
Learning Objectives	287
Background	287
Evidence That Mammalian Immune Systems Affect Tumors	289
Tumor–Host Interactions	290
Outcomes	292
Clinical Correlation: Follow-Up	293
Student Considerations	293
Possible Explanations	294

**Chapter 18: Veterinary Clinical Laboratory Immunology 295**

Clinical Correlation: Transfusion Reactions	295
Learning Objectives	297
Principles of Antibody-Based Techniques	298
Generating Antibodies: Polyclonal and Monoclonal Antibodies	298
Production of polyclonal antibodies	298
Production of monoclonal antibodies	299
Detecting Antibody–Antigen Reactions	300
Specific Techniques	300
Enzyme-linked immunosorbent assays	300
Immunoblotting	302
Immunofluorescent microscopy	303
Precipitation assays	304
Flow cytometry	305
Immunohistochemistry	306
Diagnosis of Blood Type Incompatibilities	307
Blood Typing	307
Blood typing cards	308
Typing gel	308
Membrane dipstick	309
Crossmatching	309
Diagnosis of Immunodeficiencies	312
Serum Immunoglobulin Quantification	312
Phenotypic Analysis of Lymphocytes	312
Other Immunodeficiency Tests	313
Diagnosis of Autoimmunity	313
Antinuclear Antibody Test	313
Coombs Test	314
Antiplatelet Antibody Test	314
Antithyroglobulin Autoantibody Test	315
Clinical Correlation: Follow-Up	316
Student Considerations	316
Possible Explanations	316
